Touching textile

1. Microflex curtain hook

PPS-2200i

Fully automatic, completely autonomous curtain pleating machine with an integrated Microflex curtain hook feeder and indexer.

- Advanced, versatile sewing machine designed to execute all steps in the pleating process such as pleat calculation, machine setting, pleat folding, hook feeding, pleat stitching and pleat tacking.
- The indexer ensures a smooth supply of the curtain in the machine enabling the operator to operate several machines.
- Thanks to a constant and tension free fabric feeding, a very high and uniform pleating quality is achieved and maintained.
- The machine is pre-programmed for the production of double and triple pleats with embedded Microflex curtain hooks in the length of 55, 75 and 95 mm. A special version for the production of 127 mm (5") pleats is optionally available.
- Finishing of the pleat end can be done either by a F- or L-tack.
- If desired, the machine also is available without an indexer.
- Maximum pleat range is 99.99 meter unpleated fabric.
- Minimum pleat distance is 75 mm.

Eisenkolb has developed into the market leader in the curtain processing industry. As a provider of total solutions, we offer you an unprecedented expertise and supporting service based on technically superior machines and materials. That is how Eisenkolb contributes to the optimization of the primary processes in the textile related industries. Customer-oriented, starting from feeling for textile.
